

Online system explained

When a system is online, it means it is connected to the internet and operates through cloud-based servers.

Online system advantages:

- ✓ **Remote Accessibility:** With an online system, you can access your POS data and manage your business from anywhere with an internet connection. This allows you to monitor your business in real-time, even when you're away from the physical location.
- ✓ **Automatic Updates:** Online systems can automatically update to the latest software versions, ensuring you have access to new features, security enhancements, and bug fixes without manual intervention.
- ✓ **Scalability:** Cloud-based POS systems can easily accommodate your business's growth, allowing you to add more selling locations, terminals, or features as needed without significant additional infrastructure.
- ✓ **Data Security and Backup:** Your data is stored securely in the cloud, with regular backups to protect against data loss. This also ensures that your data remains safe in case of hardware failures or other unforeseen issues.
- ✓ **Integration with Other Tools:** Online systems can integrate with other software tools such as accounting, inventory management, and CRM systems, streamlining your business operations and improving efficiency.

Online system disadvantages

The system relies on a stable and reliable internet connection for day-to-day operations. Any interruptions or slowdowns in internet service can affect your ability to use the system effectively.

Overall, an online system provides convenience, efficiency, and flexibility, helping you run your business more effectively.

Charges:

System Installation Charge: The cost for offline system installation is **700,000**.

This includes:

- ✓ **Data Entry:** Initial data setup and entry to get your system running smoothly.
- ✓ **Training:** Comprehensive training for your team to effectively use the system.
- ✓ **Support:** On-site support for any issues or questions you may have during the first year.
- ✓ **1-Year License:** A license to use the system for one year.

Note: Please note that equipment costs are not included in the 700,000 payment.

- ✓ **New Selling Location Charge:** Each new selling location added to the system incurs a one-time charge of 350,000. For each selling location, storage locations are free.
- ✓ **Annual Renewal Fee:** There is an annual renewal fee of 150,000 for each selling location.
- ✓ **Annual hosting Fee:** An annual hosting fee of 250,000 is also applicable.
- ✓ **Annual license & maintenance Cost:** Additionally, there is an annual maintenance fee of 250,000 to ensure the system continues to operate efficiently and effectively.

These fees help us support the complexities of managing the software maintaining high-quality services for all our users.

Thank you for choosing our software. If you have any questions, please feel free to reach out.
